yeah I know you did not ask!

You should so be blessed – well cursed at times actually – with a mind such as mine, making all these weird connections between my rumored neurons. Just be thankful that I do not share all of my random thoughts.

“A picture is worth a thousand words” is an adage in multiple languages implying that a single picture could simplify what might be very complex and lengthy to put across in words.

To update for our times this adage might need to read, “A PhotoShopped or AI generated picture is worth a thousand lies.”

All too often, with increasing frequency, it is hard to tell what is true or what is someone pushing a particular vision... or something worst, far worst.

The times we live in.
