yeah I know you did not ask!

What about next time Congress has some “must pass” legislation, instead of slipping a rider that benefits only the fats cats and decreases our democracy, we tact on riders to benefit all of us. Perhaps something to reform the student loan program, and make college affordable; perhaps something that will help bring good jobs back to America; perhaps legislation to bring our infrastructure into the 21st century; perhaps a realistic minimum wage; perhaps a tax code change to decrease the wealth gap; I could go on an on, but you get the idea.
